## A great place to meet

Soft seating and tables family aimed at creating **informal semi-private spaces** in an open plan area, to turn neglected in-between spaces into useful meeting places. Bix's clever backrest screen prevents people from being distracted by others in a busy workspace.

### In & Out

Bix has a neat connectivity that allows easy access to power and data at table level.

### Cable management

Cables are routed via the centrally-mounted table legs, keeping them out of sight but within reach.

### Leg frame and glide

The leg frame holds seating firmly in place.

### Table top

The table top is available in different colours with matching edges.

## Bix's environmental performance

During **Bix's** development process we considered environmental impacts of our decisions at every stage of the **product's lifecycle - from materials extraction, production, transportation, use and re-use, to end of life.**

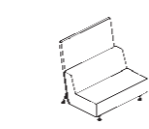

With Bix we can provide a **Product Environmental**

**Profile (PEP):** based on the ISO 14021, its purpose is to communicate precise, verifiable and accurate information on environmental aspects of Bix during its life cycle (list of materials, materials' origin and certifications, percentage of recycled content, plants' certifications and manufacturing processes, packaging, products' recyclability).

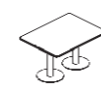

### Spontaneous meetings

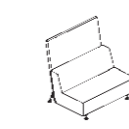

Bix makes it easy to hold informal and spontaneous meetings thanks to the power and data connectivity that can be integrated in to the table.

### Open spaces

Bix gives you the flexibility to make the most of in-between spaces. Create an informal teaming area close to workstations to give your people an inspiring place to talk things over.
